

INSTRUCTIONS FOR USE:

- For best results, begin using Miaderm® Radiation Relief one week prior to the start of treatment.
- Apply Miaderm three to four times daily to areas of skin within the radiation treatment field.
- Do not use within one hour prior to radiation treatment.
- Discontinue if skin ulceration develops as a result of radiation treatment.
- Continue use for two weeks after final treatment to minimize delayed side effects of radiation.
- When applied as directed, one 4-oz. tube of Miaderm should last approximately two to three weeks.
- For external use only.
